360 Product Photography

ADDING THE 360 PRODUCT TO YOUR WEBSITE

QUICK START

COPY AND PASTE THIS CODE TO YOUR WEBSITE

<script src="randj.js"></script>

<div style="height:400px; width:600px;" class="Example00020002"></div>

<script src="Example00020002.js"></script>

Note:

The first line: <script src="randj.js"></script>

Must be located above

the last line : <script src="Example00020002.js"></script>

Order is important!

Note:

The files and folder **Must be in the same folder as the webpage you wish to display the 360 image in.**
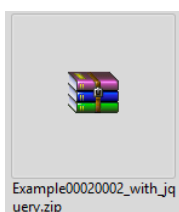

FULL INSTRUCTIONS

Download

Download from 'Ready for download' tab in your profile page:

Once you have downloaded your file you should have a Zip file, which should be something like Example00020002.zip.

Note: The numbers will be different for your download.

Example00020002_with_jquery.zip

UNZIP TO YOUR WEBSITE

Next you need to unzip the file with a program like WinZip. If you don't have the program it is free to download and the link is below.

http://www.winzip.com/landing/download-winzip.html

Extract the files to the directory you wish to use your 360 Image.

Example00020002   Example00020002   randj.js   myWebSite.html
                         .js

Here myWebsite.html is the site you wish to use the 360 download in. The other 2 files and folder are your download.

SAMPLE WEBSITE WITH 360 PRODUCT CALLED: EXAMPLE00020002

If we look in the myWebsite.html file:

```html
<!DOCTYPE html>
<html>
  <head>
    <meta charset="UTF-8">
    <title>title</title>
    <script src="randj.js"></script>
  </head>
  <body>
    <div style="height:400px; width:600px;" class="Example00020002"></div>
    <script src="Example00020002.js"></script>
  </body>

</html>
```

WHAT DO I DO?

There are 3 lines of code you will need to add:

<script src="randj.js"></script>

```
<div style="height:400px; width:600px;" class="Example00020002"></div>
```

```
<script src="Example00020002.js"></script>
```

```
<script src="randj.js"></script>
```

- Loads the libraries needed to run your 360 product

```
<script src="Example00020002.js"></script>
```

- Loads your 360 product

```
<div style="height:400px; width:600px;" class="Example00020002"></div>
```

The place where you want the 360 product to display. The width and height values can be omitted or changed if required

e.g. `<div class="Example00020002"></div>`

or,

```
<div style="height:200px; width:300px;" class="Example00020002"></div>
```
